

Unified Internship Navigator

Mini project by
Alviya Benoy
S6 IT

My current Scenario

- Internship opportunities are received by the placement cell via email and shared through WhatsApp and notice boards.
- Students register using external Google Forms within fixed deadlines.
- Resume submission and faculty approval involve manual emails and physical forms.
- Shortlisting is done manually by the placement cell using Excel spreadsheets.
- There is no centralized system to track applications, eligibility, or final selections.

Dear Students,

We are preparing the **student nomination list** for the **Infosys Springboard Virtual Internship Program** (starting after December 15, 2025).

If you are interested in participating, **please register your name using the link below:**

👉 [Registration Form](#)

Eligibility:

- Students who are willing to complete the required Infosys Springboard courses & proctored certifications.
- Students who are interested in **internship** experience in IT & related domains.

What you need to do now:

1. Register your name using the above link.
2. Go through the attached guidelines to understand the course requirements.

🔴 Exciting Internship Opportunity! 🔴

Dear Students,

Join a **10-Day Online Internship** with a **US-based AI Tech Company** and take your first step into the world of Artificial Intelligence!

This specially designed internship will help you: 👉

- ✓ Understand AI, Machine Learning & Deep Learning fundamentals
- ✓ Learn practical tools like Pandas, NumPy, TensorFlow & Scikit-learn
- ✓ Build real-world mini projects (Sentiment Analysis / Image Classifier / AI Agent)
- ✓ Experience Agile workflows used by top tech companies
- ✓ Get Internship Certificate + Project Completion Certificate

Proposed Solution: Unified Internship Navigator

- Unified Internship Navigator is a comprehensive web-based platform designed specifically for our campus to coordinate all the entire internship opportunities . The system replaces fragmented WhatsApp communications, manual Google Form registrations, and Excel tracking with a centralized, role-based portal built using Node.js, Express, and MongoDB.

INTERNSHIP MANAGEMENT PORTAL

S R Patil,¹ K Saiveena², Sakshi Somani³, Soujanya I Pavate⁴

Department of Information Science and Engineering, Basaveshwar Engineering College (Autonomous), Bagalkot-587103, Karnataka, India

Abstract -- The increasing demand for streamlined and effective procedures in the administration of internships is met by an internship management portal. A single platform that facilitates the complete internship lifecycle is necessary in today's dynamic work climate for firms offering internships, students looking for an internship, as well universities can use it.

The screenshot displays the Unstoppable Internship Management Portal. The header includes the Unstoppable logo, a search bar, and navigation links for Host, For Business, and Login. The main content area features a list of internship opportunities with filters on the left. The first listing is for a 'Full Stack Developer Internship' at Wikasta Business and Technical Solutions Pvt. Ltd., with details on requirements, location, and salary. The second listing is for a 'Campus Representative Internship' at YHills Edutech Private Limited. A 'Featured' section on the right highlights various contests and challenges.

technology stack (frontend, backend, tools, frameworks):

Web: HTML/CSS/JS, Node.js, MongoDB

Functional requirements:

Student side:

- Students can create and update a profile with CGPA, skills, projects, and past internships
- Students can view all active internships with details, search/filter them, and see external apply links.
- Students receive recommended internships based on their skills and department.
- Students can apply with one click and track status such as Applied, Shortlisted, or Selected.

Admin panel:

- Admins can post new internships with title, company, eligibility, skills, and deadlines .
- Admins can view all applicants per internship with filters like department and CGPA.
- Admins can shortlist or reject students and update their status in the system.

Class teacher / mentor side:

- Teachers can log in and see applications only from their own students.
- Teachers can approve or reject applications or nominations when required.
- Teachers can review completion details and record brief feedback for each student.

Modules:

- Student module
 - Register/update profile (CGPA, skills, projects, resume link).
 - View all active internships and recommended ones by department/skills.
 - Apply via “Apply in Portal” and track status (Applied, Shortlisted, Selected, Rejected).
- Admin (Placement Cell) module
 - Post campus-verified internships from company emails.
 - Manage internship list (search, basic filters).
- View all applications with filters (department, CGPA, skills, time).
- Update application status and see real-time notifications for new applications

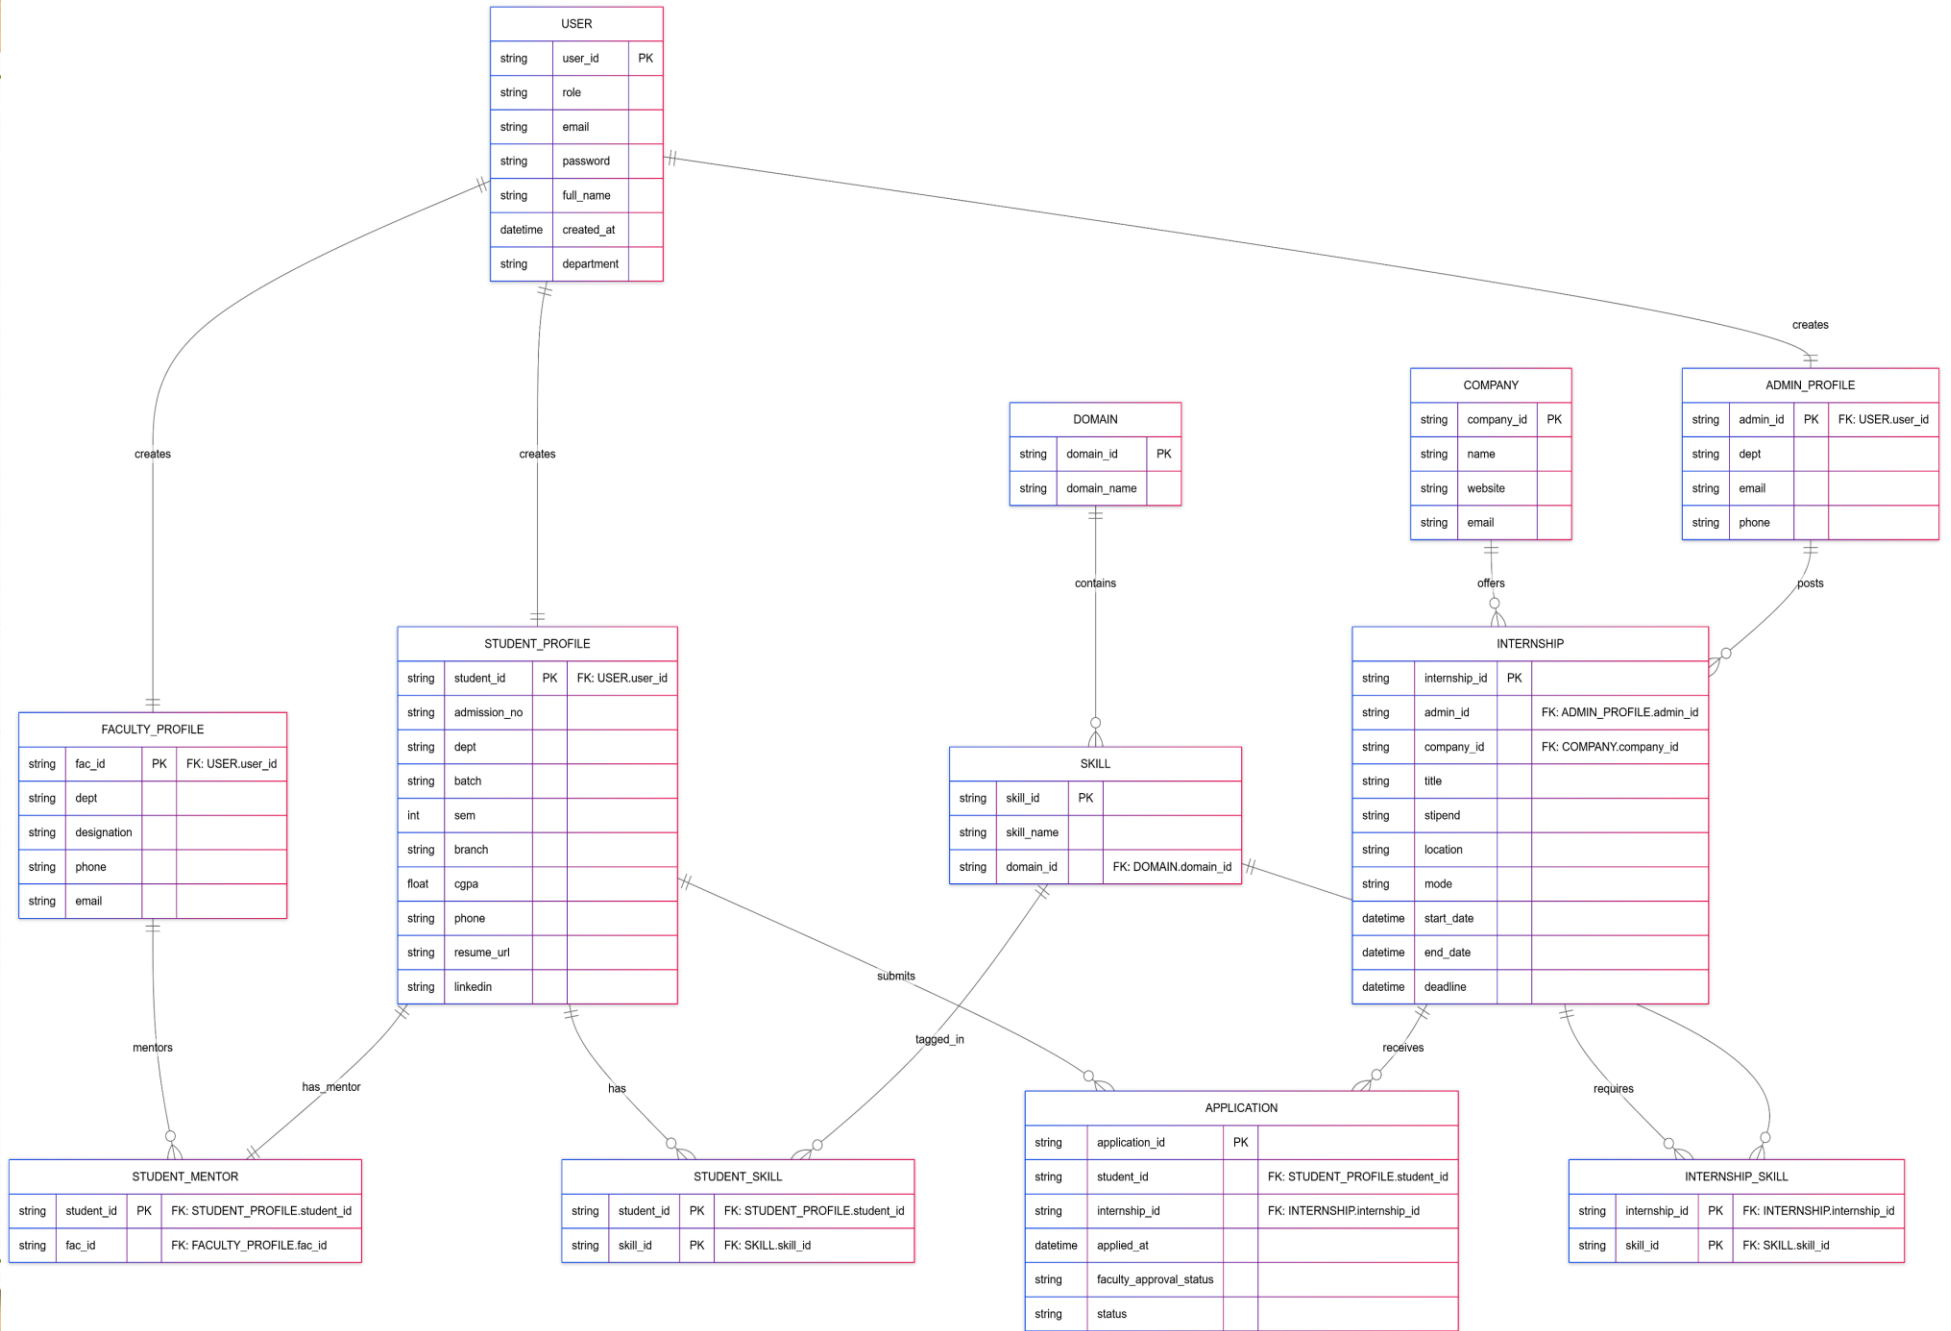

Teacher/Mentor module (planned/lightweight)

- View applications from students of own department.
- Optionally review/approve nominations and add brief feedback

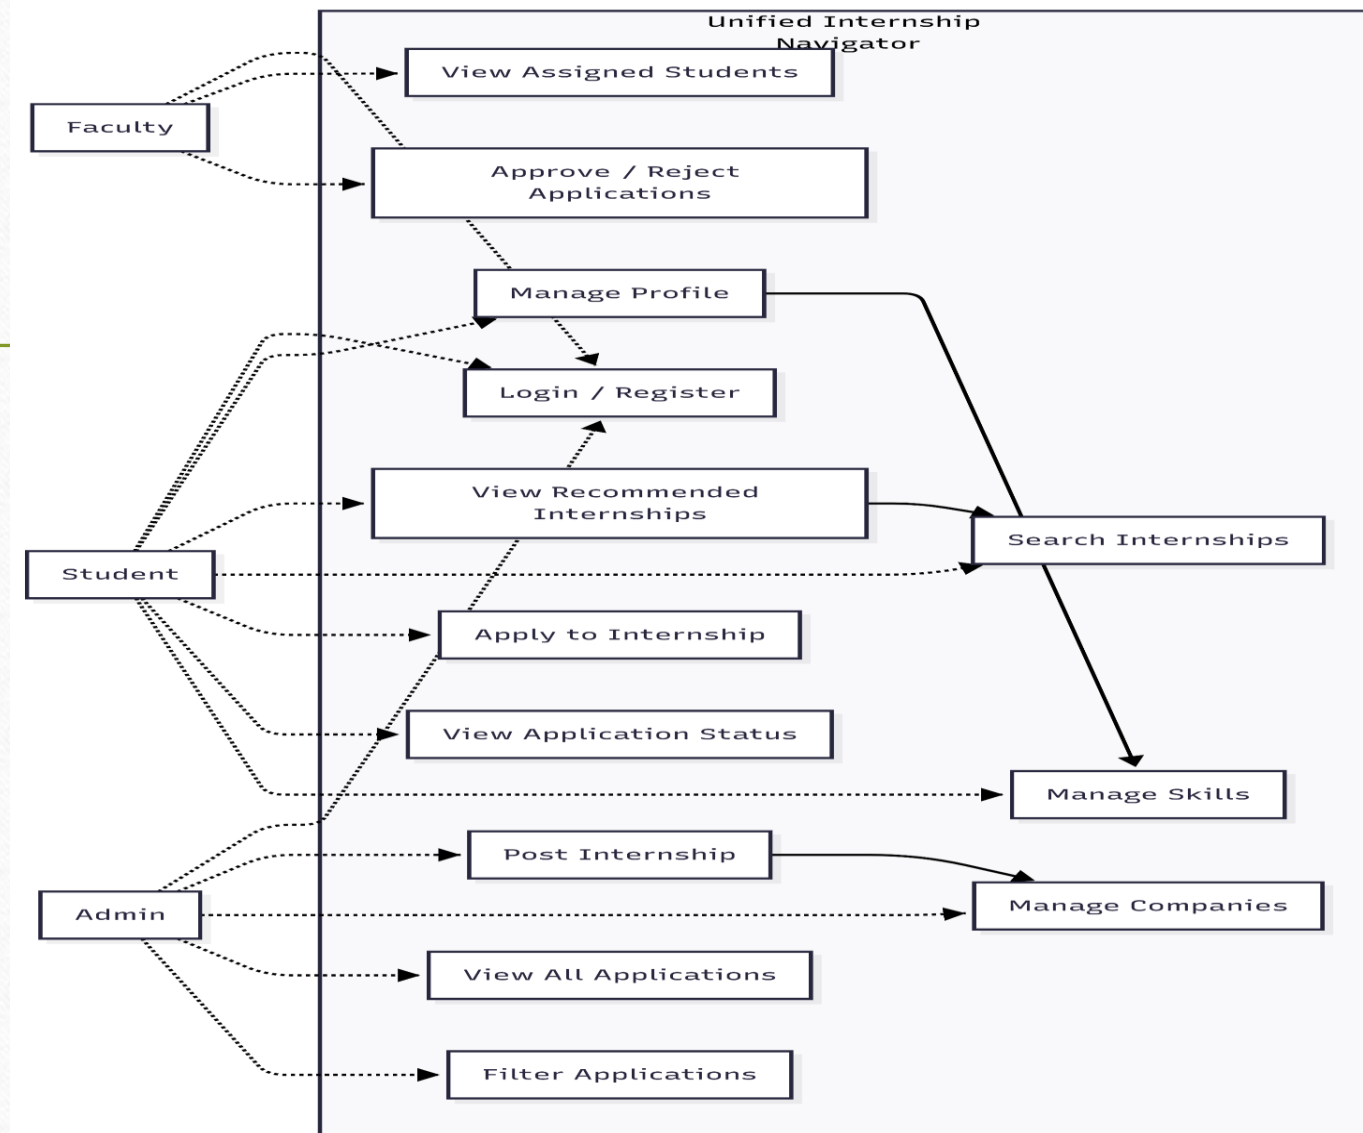

Literature survey

- Student module
 - Existing internship and placement portals let students maintain profiles and apply to postings, reducing repeated Google Forms and manual email submissions.
 - Research on placement cell automation emphasizes dynamic student profiles including CGPA, skills, projects, and certifications to support better shortlisting.
- Admin module
 - Prior internship management systems highlight the need for centralized posting and applicant tracking instead of Excel and email workflows.
 - Use-case studies show admins require filtering by department and CGPA and the ability to update candidate status within the portal itself.
- Teacher/Mentor module
 - Many university systems give faculty access to only their students' data, so mentors can approve internships and verify completion.
 - Literature on student placement cells notes that teacher feedback recorded in the system improves transparency and record-keeping.
